NorCal Roll-off Truck Systems

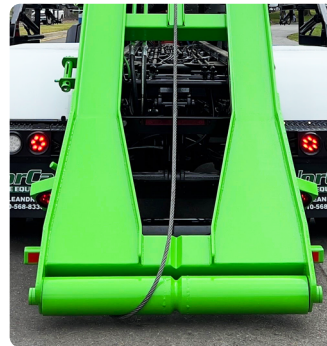

Built for durability, serviceability, and real world container work

Norcal roll-off truck systems are available in 50,000, 60,000, and 70,000 lb capacities for demanding refuse, recycling, construction, municipal, and industrial applications. Each system combines heavy-duty construction, practical hydraulic integration, and application-specific configurations to support reliable daily operation and straightforward fleet service.

Hydraulic Stiff-Leg

Maximize your stability with our hydraulic stiff-leg, which stabilizes our unit even on tough inclines, and uneven surfaces.

V-Roller, Driveway Saver

Spreads the load and saves driveways, avoiding gouges, cracks, and scratches in driveways during loading.

Robust Box Stops

Heavy-duty stops protect driver and help position and secure containers during loading, transport, and dumping operations.

Fortified Cylinder Mounts

Reinforced mounting points built to handle repeated hydraulic load cycles in demanding service.

NorCal Roll-off Truck Systems

Available Capacities 50,000, 60,000 & 70,000 lb

Features

Heavy-Duty Construction

- Robust Tube-frame construction
- Dual lift cylinders
- Auxiliary lift axle
- Reinforced cylinder mounts
- Reinforced mast pivot
- Robust box-stop construction
- 42" V-roller driveway saver
- Hydraulic stiff-leg stability system
- Integrated custom toolboxes

Available Configurations

- Winch or twin-cylinder reeving hoist
- 6", 8", 10", or 12" top-channel systems
- Heavy-duty side-roller configuration
- Rear wetline for auxiliary hydraulics
- In-cab and exterior air controls
- Automatic air-lift ICC bumper
- Towing equipment available
- Additional storage configurations

Rear Wetline Kit

Optional rear hydraulic connections support trailer and auxiliary hydraulic equipment for work in the field.

Reinforced Mast Pivot

Reinforced construction helps distribute repeated lifting loads and reduce concentrated stress at the pivot.

Built Around the Trucks You Run

NorCal Waste Equipment builds and services roll-off bodies for a wide range of heavy-duty truck platforms, including diesel, renewable diesel, natural gas, propane, gasoline, battery-electric, and hydrogen fuel-cell vehicles. We install CNG and RNG fuel tanks, helping fleets build, convert, and support the trucks their operation depends on.
