Roll-off Truck Systems

Built for Refuse, Recycling, Construction & Fleet Service

Norcal roll-off truck systems are available in 50,000, 60,000, and 70,000 lb capacities for demanding refuse, recycling, construction, municipal, and industrial applications. Each system combines heavy-duty construction, practical hydraulic integration, and application-specific configurations to support reliable daily operation and straightforward fleet service.

AVAILABLE CAPACITIES

50,000 LBS

60,000 LBS

70,000 LBS

NorCal BUILT TO WORK

-  RUGGED CONSTRUCTION
-  UPTIME THAT PAYS
-  BUILT FOR HIGH-CYCLE WORK

NorCal Standards

RUGGED CONSTRUCTION

UPTIME THAT PAYS

BUILT FOR HIGH-CYCLE WORK

Container Handling

- Top Channel in 6", 8", 10", or 12" or
- Side Roller with hi-count greaseless bushings
- Hydraulic Winch or Dual Reaving Cylinders
- Extreme Duty Box Stops
- Rear Ratchet – Gunebo Hook System
- Tail Entry made with A/R Plate

Hydraulics & Controls

- Chelsea PTO
- Gear, Piston, or Vane Pumps
- Parker VA35 Series
- Parker Filtration
- Air or Electric Controls
- Rear Hydraulic Wetline

Structure & Durability

- Reinforced Hinge Plate Assembly
- Heavy Duty Safety Hoist Stands
- Heavy Duty Fender – Standard
- Painted Company Color – Single
- Lifetime Frame and 2 Year Hydraulic Warranty

Safety & Visibility

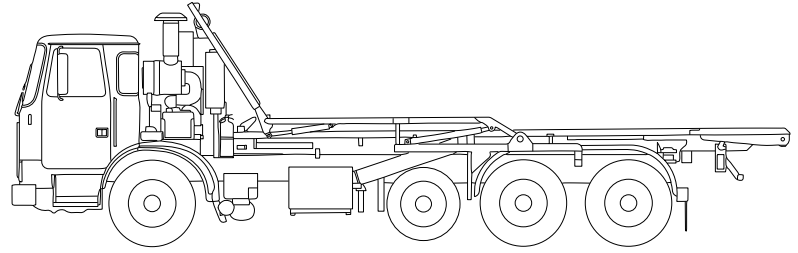

- Automated ICC Bumper
- Full LED Lighting
- All Safety Requirement Labels, Alarms, and Lights

Cables Options

7/8" or 1"

Toolbox(s)

Hydraulics, Controls & Fleet Equipment

Hydraulic and packages can be configured around the truck, hoist style, and fleet preference, with service oriented component placement and a broad range of road and body equipment.

Dual Lift Axle Design

Adds load support when needed while keeping the truck more maneuverable when raised.

- ✓ Improves axle weight distribution under heavy loads
- ✓ Reduces tire scrub and unnecessary rolling resistance when lifted

Hydraulic Tarp Control

Spreads the load and saves driveways, avoiding gouges, cracks, and scratches in driveways during loading.

- ✓ Hydraulic operation for fast, reliable container coverage
- ✓ Multiple configurations to match container and fleet requirements
- ✓ O'Brien, Pioneer & other proven tarping systems available

Operator Controls

Gives the operator convenient control of the hoist from inside the cab or from a clear working position outside the truck.

- ✓ In-cab controls for fast, convenient operation
- ✓ Exterior controls provide direct visibility of loading and unloading
- ✓ Air or electric control configurations available

Auxiliary Wetline

Provides convenient rear-mounted hydraulic connections for compatible trailers and auxiliary equipment.

- ✓ Simplifies hydraulic hookups at the rear of the truck
- ✓ Expands versatility for hydraulic trailer and accessory operation
- ✓ Reduces setup time when switching between equipment

Built Around the Truck You Run

NorCal builds and services roll-off bodies across all truck platforms, you name it we build it.

Compatible Fuel Platforms

Diesel | Renewable Diesel | Natural Gas | Propane
Gasoline | Battery-Electric | Hydrogen Fuel-Cell

CNG and RNG fuel-tank installation available

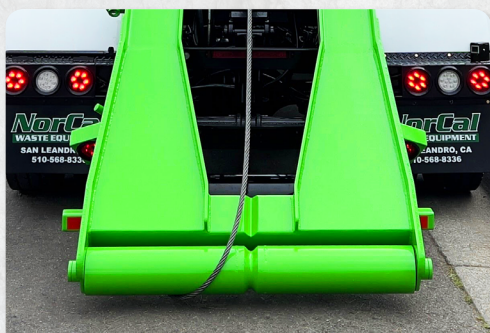

Container Handling & Stability

Confident container handling starts with a stable truck. NorCal combines rear support, positive container guidance, and reinforced load points to keep the operation controlled from pickup through placement.

Hydraulic Stiff-Leg

Adds rear support right where the truck needs it most, helping keep the unit planted and controlled during loading and unloading.

- ✓ Reduces suspension droop during loading and unloading
- ✓ Helps minimize front axle lift under high-load conditions
- ✓ Transfers load to the ground at the rear of the chassis
- ✓ Improves stability during container loading and unloading
- ✓ Helps reduce stress on the truck suspension during repeated lift cycles

42" V-Roller, Driveway Saver

Spreads the load and saves driveways, avoiding gouges, cracks, and scratches in driveways during loading.

Robust Box Stops

Heavy-duty stops take the impact of container loading, secure containers, and restrain movement during transport.

Reinforced Mast Pivot

Extra reinforcement at the mast pivot helps manage the heavy loads generated through every lift and supporting longer service life.

Built for strength, Built for control

NorCal roll-off systems are engineered to keep containers secure, and your truck stable, when you need it most
