Champ Truck Systems

Smarter Access. Lower Cost.

The CHAMP™ Compact Container Transfer System is designed to deliver, retrieve, transport, and stage 2-10 cubic yard containers with a compact, highly maneuverable platform. Built for locations where full-size trucks and front loaders are impractical or unable to operate, CHAMP™ provides an efficient solution for underground garages, apartment communities, commercial properties, restricted-access locations, bulk curb service, and other tight-space applications. Its compact footprint also makes it well suited for on-site container service and repair, giving operators a versatile alternative to deploying larger equipment for smaller-container work.

CONTAINERS 2-10 YARD
